

The Benefits of Being Vegetarian: The choice we make is therefore always of consequential significance

Now You Can Discover How You can Your Family Can Easily and Safely Avoid the Chemicals, Preservatives, Growth Hormones and Other Harmful Toxins Found in Almost All of Today's Meats and Over-Processed Foods! Vegans and vegetarians the world over have discovered the truth - that you are what you eat! But if you've eaten meat and other animal products your whole life, you may be thinking Why Switch to a Vegetarian Diet? After all, you've lived your whole life eating eggs, hamburgers, dairy products, hot dogs, poultry, beef, pork, fish - so why should you go vegetarian now? There are a lot of good reasons to switch. Answer these questions to yourself and the reasoning behind a healthy vegetarian lifestyle will become very clear to you. Are you at a healthy body weight for your age? Do you look and feel good most of the time? Do you wake from your normal sleep feeling energized? Or instead, do you wake up tired and sluggish? Is your blood pressure within a healthy range? Are your cholesterol and blood sugar ranges normal? Do you feel energized after eating, as if you've fed your body what it needs? Or do you feel sluggish and often need a nap after eating? Most People Wouldn't Abuse Their Car Like They Abuse Their Bodies! Food should nourish and feed the body and leave us energized and refreshed. The human body is a machine that needs the right kind of fuel to keep it running right and in peak condition. When we eat high fat meats, low fiber processed foods, and fill our bodies with preservatives and chemicals, we're much more prone to high blood pressure, Type II diabetes, high cholesterol and other serious health issues. A car engine that hasn't been tuned or isn't getting the type of gasoline it needs simply will not run efficiently, nor live for as long as it was intended to do. Your body is the same way. It needs the right kind of fuel to run at peak efficiency. And when you're

eating high fat meat, or meat that's been fed antibiotics throughout its life, that's simply not the kind of fuel the human body is intended to use! Just Try Eating Vegetarian. THE BENEFITS OF BEING VEGETARIAN is literally crammed with facts, pertinent information, guidelines, and meal suggestions that you and your family can actually use to make the switch from a sluggish diet of toxic meats and other unhealthy (so called) foods to clean, wholesome, and energetic living with vegetarian foods that nourish your body instead of running it down.
