

# Against Compulsory Vaccination: Why HPV Vaccines Are Dangerous To The Lives Of Girls, Young Women And Everyone Else

This book provides valuable information about HPV and HPV vaccines---by answering the following questions: - What is the HPV virus? - What is the pharmaceutical industrys motive for making the HPV virus a big issue? - What is the actual (not assumed) claim made by manufacturers of HPV vaccines concerning the safety of these drugs? - What injuries to the brain and body do the chemicals that make up HPV vaccines cause? This book reveals the true extent of the injuries experienced by girls and women who have received HPV vaccines. Equally as important, this book educates readers about the theory of vaccination, and how it contradicts the biological workings of the human body. We discuss the delicate processes of human growth and development; and explain how vaccines disrupt these vital processes, especially those related to the neurological and immune systems.
