

Alcohol, Cocaine, and Accidents (Drug and Alcohol Abuse Reviews)

In Alcohol, Cocaine, and Accidents leading experts provide concise yet focused scientific reviews of the role of alcohol and cocaine in automotive, aviation, and aquatic accidents. The authoritative contributors present both applied research and epidemiological studies, with emphasis on the prevention of injuries through an increased use of appropriate educational labels, law enforcement, and personal and community-based prevention programs. In addition to detailed topical coverage, the articles suggest prevention strategies and provide supporting data for the role of treatment in reducing accidents. Alcohol, Cocaine, and Accidents will be of interest to substance abuse researchers, law enforcement officials, treatment providers, policy makers, and legislators responsible for regulating alcohol and drug use, as well as safety issues in all areas of transportation.
