

Babyphobia: The Courage To Conceive

LET'S TALK ABOUT YOUR FUTURE BABY Yes, you all have the right to become a mother, and do not let anyone tell you different. Let me tell you a story that happened twenty-one years ago: I had a female friend; tests showed that her Fallopian tubes were blocked. The doctors, all of them top gynecologists, told her to give up on her dream; that if she wanted a child, she should adopt one because medical knowledge at that time gave her a zero percent chance of her conceiving. Just a few days ago, her son celebrated his twentieth birthday. She conceived naturally, had very stable pregnancy and the baby was born healthy. When she asked the doctors, How come? they said, We don't know. This was not a miracle. Our minds are much stronger than we know, for better or for worse. Do not let anyone give you any excuse why you do not conceive. Pregnancy can be the essence of a woman's existence. A baby can bring a pinnacle of happiness that no drug can match. For the last twelve years, I have helped many women to conceive. How? During my years of practice, I developed a method of treatment I call Rebound Psychotherapy. My aim is to quickly and efficiently help people suffering from anxieties, including fear of flying, agoraphobia, OCD, ADD, ADHD, and many others. I soon found out that many healthy women who came over to me for therapy conceived naturally during the therapy process. Initially, perhaps, they came for treatment for other anxieties, while in parallel they were planning to conceive or to undergo IVF. Soon enough, I realized that my Rebound Psychotherapy system can touch the places in the patient's mind that can prevent the body from conceiving. My findings showed that many healthy women* do not conceive due to a mental barrier stopping the woman's reproductive system from working properly. Take the first step: the step to serve only yourself, the step that

will lead you to a happy future, a future centered on your own family the children you proudly brought into the world in the most natural, exhilarating way. * I would like to emphasize that when I refer to a healthy woman, I mean a woman with a healthy reproductive system.
