

WATER IS FUEL: Convert Your Vehicle to Run on Water

INTRODUCING THE WORLDS FIRST PERSONAL FISSION REACTOR! The DR. FISSION Personal Fission Reactor allows you to create your own fuel, on-demand, from the purest and most abundant source of energy on the planet, water. The Personal Fission Reactor splits water molecules, a process known as Molecular Fission, to safely generate pure hydrogen and oxygen which can be used in a variety of applications. Fitting the DR. FISSION Personal Fission Reactor to a vehicle results in a low-cost, eco-freindly on-demand fuel generator. Much like engines which run on hydro-carbons from gasoline and oxygen from the atmosphere, engines fitted with a Personal Fission Reactor run on hydrogen and oxygen generated from water, H₂O. The DR. FISSION Personal Fission Reactor has numerous in-home applications as well, including the worlds most efficient home and water heating systems. DR. FISSION Personal Fission Reactors can also power personal, commercial and industrial equipment while saving you thousands by never purchasing expensive fuels like propane, oxy-acetylene, gasoline or diesel again! Once split, by the process of Molecular Fision, water can be used to fuel torches that reach temperatures of up to 4488K (4215C, 7619F) or to power any vehicle or equipment that employs an internal combustion engine. WATER IS FUEL: CONVERT YOUR VEHICLE TO RUN ON WATER by Drew Paul is not only the definitive resource to understand this remarkable technology; it also includes step-by-step instructions for converting nearly any engine to run on hydrogen and oxygen generated from water. What you are about to read is remarkably simple science but it has escaped the vision of so many who want to make this more complicated than it is. We are going to use an electrical process to decompose water into its constituent parts. You know that

water is H₂O. That is one molecule made up of three atoms. We are simply going to use electricity to separate them which results in a gas that can be burned to cut steel, heat homes or run a combustion engine. SEE MORE AT: DrFission.com

Water Powered Car You can make a fuel from water that can be used to power a car. battery or making your engine work a bit harder to perform the conversion. **Car Runs on Water, Inventor to Be Kidnapped by Exxon - Gizmodo** An oxyhydrogen generator, like this one, uses electricity from your car battery to split water into hydrogen and oxygen gasses. (Electricity + 2H₂O --> 2H₂ + O₂) **The Truth About Water-Powered Cars: Mechanics Diary** - 2 min - Uploaded by M MassieHow to Convert Your Car to Run on Water (Easy, Cheap, Quick!) the average consumer **Best Hydrogen Car Kit - How To Run Your Car On Water Part 1** So YES, it is possible to run it on water or to mix gas and H₂ to improve efficiency. . Your newer car may have one,two, three or four O₂ sensors. . It seems that the history of hydrogen conversion from water started from a **Can Cars Use Water for Fuel? - Scientific American** The best solution for you is to convert your car to run on water. This method will save you up to 75% of gas and will double your gas mileage in some case. **Convert Your Engine To Run On Ordinary Tap Water - YouTube** - 3 min - Uploaded by HydrogenHybridKitsCheck <http://> for details. Convert Your Car to use WATER As FUEL This is the easiest and lowest-cost way to convert your car to run on (relatively) free The only real change is that you are using tap water as fuel, instead of the **Convert Your Car to use WATER As FUEL Source - HHO Generator** In July 2005, an American mechanic released most of the details of his simple conversion system which allows an ordinary car to use water as the only fuel. **Water Car Test - HHO Shows Why You Cant Run Cars on Water** Run your car on water and gas and you can save up to 50% of your fuel costs plus double your mileage. **Water to Fuel Conversion - Can I convert my car to run on water** - 10 min - Uploaded by hhowatergasolineConvert Your Engine To Run On Ordinary Tap Water Suitable for all engine types **Water Powered Car It Doesn't Matter If Its From Your Tap, Bottled** - 2 min - Uploaded by Carey DaveCheck <http://half-water-half-gas/> for Details! Half Water Half Gas - Fuel **Can You**

Really Run Your Car on Water? - ThoughtCo - 6 min - Uploaded by fuelwatergasolineBest Hydrogen Car Kit - How To Run Your Car On Water Part 1 This is due to the fact that **Running a Car With Water Conversion Kits - ThoughtCo** He says his company, Hydrogen Technologies, uses standard water to create Prototype car runs 100 miles on four ounces of water as fuel All you are doing is using gasoline to turn water into hydrogen then back into water again, which uses the same amount of fuel as just running your car on gasoline. **Run Your Car On Tap Water - Spirit of Maat** - 5 min - Uploaded by MaynexCar runs on 100% water converted into gas. No modification was done to the car in any way **How to Convert Water Into Fuel by Building a DIY Oxyhydrogen** WATER IS FUEL: Convert Your Vehicle to Run on Water - Kindle edition by Drew Paul. Download it once and read it on your Kindle device, PC, phones or **Convert your Car or Truck to Run on Water as Fuel - Gas or Diesel** Water for fuel in lieu of oil is a breakthrough technology -- we might break our addiction to oil. Read more about the promise of water for fuel. **Water-fuelled car - Wikipedia** Spirit of Maat) we brought you a set of plans for converting an ordinary car to run on water. And, as President Bush says, hydrogen is an excellent fuel. The generator was a gasoline combustion engine exactly like the one in your car. **Can I convert my car to run on water? HowStuffWorks** **How To convert Your Car Into Being Water Powered - YouTube** Run Your Car On Tap Water Free! Run Your Car on . Most cars have oxygen sensors both before and after the catalytic converter. The ones downstream from **Converting Your Car To Run on Water -** The car that runs on FRESH AIR: It hits 111mph and only water comes out the benzene and particulates, your cars exhaust emitted only water. Yes Instead of being filled up with petrol or diesel, the Mirai (the word is Japanese for in the air it is converted into electricity, which in turn powers the car. **Why Water Won't Improve Your MPG: A PM and Dateline NBC** The entire concept of running your car on water is based on bad science. where it is burned along with gasoline, thereby increasing your fuel **WATER IS FUEL: Convert Your Vehicle to Run on Water, Drew Paul** One of these new technologies is a water fuelled car, and it has It doesnt matter if its tap, bottled, or lake water, any type of water can make this car run. that we can turn water into hydrogen fuel and use it to power cars. **How to Convert Your Car to Run on Water (Easy, Cheap, Quick** A water-fuelled car is an automobile that hypothetically derives its energy directly from water. These vehicles may be claimed to produce fuel from water on board with no other . The hydrogen is then used to generate energy to run the car. the kit uses electrolysis to convert water into HHO, which is then used as fuel. **Car runs on 100% water - YouTube** **A Hydrogen Generator You Can Build -** Whether youd want to convert your car to run on water is another matter. The process of turning water into fuel is based in science, but whether or not it will **Running an Automobile on Hydrogen Using Water, by Drunvalo** water fuel, hydrogen fuel, hydrogen electrolysis, water car, water power, H2O fuel, by the knees, if you manufacture an add on water generator to run your car! . Engines) were converted to burn hydrogen and oxygen in the water, as fuel to **none** - 2 min - Uploaded by WaterRuns CarsTruckshttp:// Convert your Car or Truck to Run on Water as Fuel - Gas or **How to Build Your Own Water Car at Home - The Green Optimistic** More than once, Popular Mechanics senior automotive editor Mike Allen has you can triple your fuel economy by burning the hydrogen from water in your car. about the same thingmaking your car run on water instead of gasoline. the buzz on the internet took a predictable turn: Commenters and
