

# Adoption of Virtual Technologies for Business, Educational, and Governmental Advancements

The Internet has become a new organization tool for innovation, creativity, and competitiveness of all business, educational, and governmental services. With the emergence of new social media networks, organizations are better able to decrease costs and increase capabilities which continue to change the lifestyles and businesses. Adoption of Virtual Technologies for Business, Educational, and Governmental Advancements provides a wide range of coverage on the adoption of technology and aims to provide a better understanding of the topics, research, and discoveries in this significant field. This book aims to cover the emerging issues in e-adoption for researchers, faculty members, and students in hopes of contributing to future discoveries.
