

Do Polar Bears Get Lonely?: And Answers to 100 Other Weird and Wacky Questions About How the World Works

Amazing and intriguing questions and answers from the team behind the international phenomenon *Why Don't Penguins Feet Freeze?* The popular-science magazine behind the runaway international bestsellers *Why Don't Penguins Feet Freeze?* and *Does Anything Eat Wasps?* takes on another irresistible batch of the strange, silly, and mind-boggling questions that plague curious minds the world over: Can pigeons sweat, can fish get thirsty, and can insects get fat? Could a person commit the perfect murder by killing someone the day after receiving a full blood transfusion? Is there a way to beat the odds of the lottery by using math? How much mucus does a nose produce during the average cold? If forced to eat parts of yourself to survive, which non-vital organs would be the most nutritious? Culled from *New Scientist's* popular *The Last Word* column and edited by Mick O'Hare, the author of *How to Fossilize Your Hamster*, *Do Polar Bears Get Lonely?* is guaranteed to amuse and amaze as much as it informs. (And if a polar bear appears to be lonely, it probably means there wasn't enough walrus for dinner.)
