

The new Third Edition of Domestic Violence: The Criminal Justice Response offers a thorough and major revision of one of the top books in the field of domestic violence and is the only text to focus on criminal justice responses which provide a detailed look inside the criminal justice system. Domestic Violence is unique in its emphasis on the victim's perspective, including the victim's needs as well as preferences for and satisfaction with intervention. It documents the diversity of victims and how this diversity affects their service needs and the impact of interventions, including unanticipated consequences of current aggressive efforts. It also looks at diversity among batterers and how these differences affect the success of various intervention strategies.
