

Terrorism and Disaster Paperback with CD-ROM: Individual and Community Mental Health Interventions

This follow-up book to Ursano et al.s earlier title Individual and Community Responses to Trauma and Disaster expands the focus on terrorism. There is widespread belief among professionals that terrorism (and torture) produce the highest and most diffuse rates of psychiatric sequelae of all types of disaster. This books international experts assess the lessons learned from the most recent atrocities. They look at prevention, individual and organizational intervention, the effect of leadership, and the effects of technological disasters and bioterrorism/contamination.
