

Economic Analysis of International Law

Through original and incisive contributions from leading scholars, this book applies economics and other rational choice methods to understanding public international law, providing a birds-eye view on some of its most fundamental elements from the perspective of economics. The chapters cover a range of topics, beginning with the building blocks of the nation state, and continuing with the sources and the enforcement of international law and its various applications and extensions. The application of economic analysis to public international law is still in its formative stages, and *Economic Analysis of International Law* provides a useful overview, as well as setting directions for new research. This volume provides a path through recent literature while identifying new areas and issues for research, making it an invaluable resource for scholars of public international law. Contributors include: A. Bell, T. Broude, B.L. Coggins, T. Ginsburg, A. Guzman, I. Kala, E. Kontorovich, J.D. Morrow, F. Parisi, D. Pi, E. Spolaore, P.B. Stephan, A. van Aaken
