

Electronic Financial Services: Technology and Management

Electronic Financial Services provides an extensive overview of technology management and information communications technologies (ICT) in the financial services. Chapters cover E-banking, E-insurance, E-stock trading and E-fundraising and use examples of state-of-the-art information systems that are supporting the Internet operations of many financial service institutions. Jargon is not avoided, but is explained thoroughly. Includes studies of e-finance systems in use by the major financial services in the world. Small case studies are included, plus questions for discussion are given at chapter ends.
