

Expedition to Nowhere: Salomon Andre'es Attempt to Reach the North Pole by Balloon

Expedition to Nowhere, first published in 1930 as *Andree: The Record of a Tragic Adventure* by George Putnam, is the story of S. A. Andree, the visionary Swedish aeronaut who, in 1897, during the great age of Arctic endeavor, left to discover the North Pole by flying to it in a hydrogen balloon. Within a matter of days, however, the balloon crashed and the explorers attempted to return to civilization by walking. For 33 years, however, the fate of the Andree expedition remained an unsolved mystery. It was not until 1930, when the expeditions last camp was discovered, that details of the explorers final days became clear.
