

True Reason: Christian Responses to the Challenge of Atheism

While New Atheists like Richard Dawkins, Sam Harris, and others proclaim loudly their rationality, clear thinking, and incontrovertible scientific arguments, others are beginning to wonder how genuinely rational they are. Have they proved anything? Have they argued convincingly? Have they pinpointed any real challenges to the credibility of Christian faith? True Reason, edited by Tom Gilson and Carson Weitnauer, brings together a compendium of writers--philosophers, apologists, ethicists, theologians, historians--who look carefully at the best arguments atheism has and evaluate their validity, logic, assumptions, and naturalist conclusions. Authors include noted philosopher William Lane Craig and popular apologist Sean McDowell, along with Gilson, Weitnauer, John DePoe, Chuck Edwards, Matthew Flannagan, Peter Grice, Randy Hardman, David Marshall, Glenn Sunshine, David Wood, and Samuel Youngs. Each chapter tackles a different atheist argument and brings reason fully into the discussion. Which is more reasonable: atheism or Christianity? Read True Reason and think for yourself. People of faith are biased, we are told. This critique is tossed so often at those who express faith in a personal God that we forget that those who express faith in atheism and secularism are themselves guilty of bias. There is no evidence to support Dawkins or Harris loud proclamations that they have secured their belief via reason. In fact, the evidence shows the opposite. Their loud diatribes and definitive conclusions show a lack of reason, and True Reason points this out. Reasonable people will take this content seriously. -- John Stonestreet, Speaker, Radio Host, Author The Point Radio, BreakPoint, and Summit Ministries One of the key talking points of the New Atheists is that theirs is the side of reason and evidence. It is a powerful rhetorical device;

after all, who would want to be on the side of irrationality and ignorance? But the contributors to this wide-ranging volume call their bluff, inverting the charge and arguing that it is not atheism but Christian theism that has reason and evidence on its side. Anyone who engages with these arguments thoughtfully will discover that it is surprisingly difficult to be an intellectually fulfilled atheist. -- Timothy McGrew, Ph.D., Professor of Philosophy, Western Michigan University A splendid and timely book. I thought all the chapters were first rate and that each contributed to the overall defense of the rationality of the Christian faith and the poverty of resources in Naturalism for accounting for the possibility of reason and science. -- Dr. Larry Lacy, (retired) Chair of the Philosophy Department, Rhodes College
