

Provocative... Challenging... The missing piece... Put words to what Ive always known and couldnt explain... A new world view... The WEL-Systems(TM) approach to organizational, professional and personal change is a new, powerful and effective model that goes far beyond tips and techniques and works with the power of the individual. Using cutting-edge science and principles from quantum biology and their relationship to organizational systems; and grounded in the power of the potential of the individual, the WEL-Systems(TM) model helps us understand - finally! - how we are part of the problem and how we can become a dynamic force in the solution. This book: * Puts the responsibility and the power back where it belongs - with each of us as an individual. * Demonstrates that we are not victims, nor are we helpless and at the mercy of the system given that we are the system. * Reminds us that we always choose from intelligence. The question is: are the choices were making creating the kind of environments/experiences, at work and at home, that we want to live? * Strips away the illusions that prevent us from being willing to take action. * Identifies the most prevalent model for corporate structures and reveals why it doesnt get us where we want to go. * Identifies the habits of thought that prevent us from taking action in our own lives. * Identifies the tools that will make a difference in the quality of our work/life.
