

Chinas Science, Technology, and Education (Sinopedia Series)

Chinas Science, Technology, and Education starts off with a short historical background on the development of science and technology research in China after her transition to a socialist market economy. Besides administering research activities through national institutes and various ministries, the educational system has also undergone holistic reform with the aim of promoting economic and social development in China. Various programs and projects related to scientific research, technical innovation, and the education and training of students, researchers, and managers are also broadly discussed. The book concludes with international exchanges and cooperation related to science, technology, and education.
