

Help, My Body is Killing Me: Solving the Connections of Autoimmune Disease to Thyroid Problems, Fibromyalgia, Infertility, Anxiety, Depression, ADD/ADHD and More

Why do I feel so lousy even after my doctor said my labs are normal? Im exhausted all the time. Ever since _____, my life has never been the same. My doctor and even my family just think Im crazy. Weve tried everything to get pregnant and are ready to give up hope. Im on 4 different meds and nothing seems to work. My sons teacher wants him on Ritalin but I know thats not the solution, but Im at the end of my rope! These are just a few questions our patients have that sparked me to write this simple, easy-to-read book that has become an ah-ha moment to its readers. It is comforting to know there is a REASON for your symptoms and downright inspiring to find out there is a SOLUTION. My heart breaks to hear the stories of the years of suffering and misery that has torn families apart and distroyed dreams. I pray this book brings hope to those who have given up, enlightens them to believe that there is a way out of their struggle, and leads them to re-capture their life.
