

Comrades, lets put a stop to it - Judaists using logical fallacies to prove that their God exists, atheists not calling them out on it, and, most of all, atheists losing debates by being bombarded with a seemingly infinite supply of logic errors. So instead of just letting it happen, learn how to debate like a pro, discredit faulty evidence that God exists, provide evidence the Judaist God from Genesis is fictional, and show how the Torah's scripture is morally unreliable with this book. All in all, this book is an absolute must if you're serious about destroying Judaists as effectively as possible in debates. Whether you buy this or not, take this with you: 1) You cannot prove that "God" does not exist, so He does. (Burden of Proof fallacy) 2) There is currently no explanation for this, so "God" did it. ("God" of the Gaps/Argument from Ignorance fallacy) 3) "God" exists because the Torah/Qur'an/Bible says it's the word of said "on true "God"" /Torah, Bible, Qur'an quotes (Circular Reasoning fallacy) 4) Many people believe "God" exists so he does (Appeal to Belief fallacy) 5) The Torah makes me feel good, so it is true (Appeal to Consequences of a Belief fallacy) 6) Muslim/Christian-I had a personal encounter with "God", so he is real. (Anecdotal Evidence) 7) I prayed to "God" and I was cured (Post Hoc Ergo Propter Hoc fallacy) 8) Ontological Argument (Fallacy of Misplaced Concreteness/Ontological fallacy + Non sequitur-concludes that this proves the Judaist "God's" existence specifically without any justification) 9) Torah prophecies (Circular Reasoning fallacy – assuming the Torah prophecies were foretold before the fact. Also, assuming that the self-contained Torah prophecies took place in the Torah + Cherry Picking – only counting the times Torah "prophecies came true" + Self-fulfilling Prophecy - a prediction that directly or indirectly causes itself to become true due to want of making it happen + Non sequitur – even if Torah prophecies came true, the leap to "God" exists doesn't follow from the premise.) 10) \*ignores argument \* Argues about something else (Red Herring fallacy) 11) \*ignores argument \* You don't believe in "God" because you're dumb/arrogant/blind/ignorant/working for Satan, atheist! (Personal Attacks fallacy) 12) This is all just lies and slander as expected from an atheist (Appeal to Motive) 13) Thomas Aquinas Five ways ( Non - sequitur "God" is the unmoved mover, uncaused cause, intelligent designer, the necessary not contingent being, the absolute, perfect standard + Non sequitur-the conclusion, that this proves the "God's" existence, doesn't follow the premise. Non sequitur- Even if it was valid evidence, Judaists would conclude that it proves the Judaist "God" specifically.) 14) Any pro "God" "evidence" whose conclusion doesn't follow the premise (Non sequitur) Example: Muslim/Christian/Deist: The Kalam argument proves that my specific "God" exists just because. 15) I cannot fathom how this came to be, therefore "God" did it. (Argument from Incredulity) 16) Absolute morality exists, therefore "God" exists. (CRF + Non sequitur) 17) "God" exists because there is a sophistication and design in the world. (False Analogy + Non sequitur + Theological fallacy) 18) "God" is love (Tautology fallacy) 19) You cannot explain where love comes from, therefore "God" did it. ("God" of the Gaps) 20) I believe in "God" because I don't want to believe there is nothing after death. (Appeal to Consequences of a Belief) 21) The world was made beautiful for us. (Appeal to Beauty + CRF) 22) "God". (You gotta' be kidding me. CIRCULAR REASONING FALLACY)
