

Behavioral Law and Economics (Economic Approaches to Law)

In this comprehensive collection Jeffrey Rachlinski brings together the most important previously published articles in the emerging field of behavioral law and economics. His selection represents a novel blending of economics, psychology and law. The three volumes cover such constituent topics as suit and settlement, torts, civil rights and discrimination, criminal law, trial processes and paternalism and regulation. The editor has written an original introduction which provides insightful coverage of this new and exciting area of study.
