

## Using Science and Technology Information Sources

The authors describe the special characteristics of sci-tech print and nonprint information sources, and show how these sources can best serve the needs of both novice and experienced researchers. They also provide facts on types of sources, features to look for, relative costs, and intended audience. The range of needs these sources will be called upon to fill, from simple curiosity to professional research are explained. Included is a procedure for answering sci-tech reference questions followed by 12 of the most common information requests and how best to respond to them.
