

Non-Tetrahedrally Bonded Binary Compounds II: Supplement to Vol. III/17g (Print Version) Revised and Updated Edition of Vol. III/17g (CD-ROM) ... in Science and Technology - New Series)

Vols. III/17a-i and III/22a, b (supplement) on semiconductor physics and technology have been published earlier, the latter covering new data on the technologically important group IV elements and III-V, II-VI and I-VII compounds only. The wealth of further data from the last decade is now being critically evaluated by over 30 well-known experts in the field of semiconductors. To meet the demands of today's scientists and to offer a complete overview on semiconductor data all data available so far are published in the following way: a series of seven subvolumes covers only the supplementary data to volumes III/17 and 22.
