

# Algorithms and Programming: Problems and Solutions (Springer Undergraduate Texts in Mathematics and Technology)

This text is structured in a problem-solution format that requires the student to think through the programming process. New to the second edition are additional chapters on suffix trees, games and strategies, and Huffman coding as well as an Appendix illustrating the ease of conversion from Pascal to C.

**Algorithms and Programming: Problems and Solutions (Springer Undergraduate Texts in Mathematics and Technology)** The problem-oriented approach makes it ideal for an applied course in basic probability and for a more specialized course.
