

Imagining Einstein: Essays on M-theory, World Peace & the Science of Compassion

Imagining Einstein: Essays on M-Theory, World Peace & The Science of Compassion, by Barbara With, picks up where Einstein himself left off, expanding on his theories and applying them to the science of compassion that stems from each one of us and ultimately leads to world peace. In her in-depth tribute to this great scientist and peace activist, her speculation on the nature of Afterlife, manifestation of matter, a unified field theory and world peace present a quantum view of consciousness and provide step-by-step instructions on resolving inner conflict and attaining global peace that begins within each individual.
