

PCEP Neonatal Care (Book III) (Perinatal Continuing Education Program)

Developed by a distinguished editorial board, the Perinatal Continuing Education Program (PCEP) is a comprehensive, self-paced education program in four volumes. The PCEP workbooks have been significantly revised and brought up-to-date with leading-edge procedures and techniques. The revised volumes are filled with clear explanations, step-by-step skill instruction, and practice-focused exercises. They offer time-saving, low-cost solutions for self-paced learning or as adjuncts to instructor-led skills training. The new Book III 2nd edition features 10 units covering information and skills for assessment and initial management of frequently encountered neonatal illnesses, plus the comprehensive unit Review: Is the Baby Sick?, which ties all neonatal therapies and skills together for management of sick and at-risk newborns. In addition, Preparation for Neonatal Transport presents care for the newborn and for the baby's family.
