

# Perspectives in Physical Acoustics: Proceedings of the Bolef Symposium Lake Buena Vista, Florida December 7, 1991

This Symposium was held in honour of the 70th birthday of Dan Bolef, Professor Emeritus at Washington University, who joined the physics department in 1963 and almost single-handedly built up the now world-renowned acoustics laboratories there. The articles in this volume are by internationally known and active leaders in the area of physical acoustics who were selected on the basis of their pedagogical skills as well as their stature within the field. This book provides a broad coverage of acoustics science and is sufficiently clear and pedagogical.
