

# The Mathematicians Cult

Mad Martian monks from the distant past, a secret weapon that saves its enemies, a rogue operative who felt he deserved the world, Armageddon fought with primitive weapons, and a new Eden on earth, this is but the backdrop of a spiritual sci-fi story that seeks not only to explore mans complex relationship with God but also to unlock the very real spiritual longings of the human soul, all thru the eyes of an alien outsider. The author, as can be guessed from the pages within, is passionate about the environment, gay rights, the pro-life movement, and most of all, God himself. He is happily married with two wonderful children and is thankful every day for his many blessings. His books are meant to promote religious tolerance, democratic ideals, and individualism, all as a way to further explore, expand and challenge religious and moral norms, and when feasible, to provide a fresh and alternate perspective to age-old truths.
