

The Human Fabric

The Human Fabric is a synthesis and extension of works from Eastern philosophy, the social sciences and management theory, ranging from The Bhagavad Gita to The Tipping Point. In this book, Bijoy Goswami explores how the three universal core energies are expressed by individuals, organizations and societies. The Human Fabric reveals how to: - Know yourself and relate to others better - Understand peoples underlying motivations - Build stronger personal and professional relationships - Assemble more successful teams - Develop innovative products and services based on the core types of your customers - Help children realize their true potential earlier in life - Shape more effective social and economic policies
