

## Social Problems: A Case Study Approach

Social Problems explores the consequences of symbolic interactionism in society, a theory which contends that people attach meanings to symbols such as language or gestures and base their behaviors on their interpretations of these meanings. Norman A. Dolch, Linda Deutschmann, and Helen Powell compile a number of critical and innovative essays that explore different aspects of society including mental illness, race relations, terrorism, and family life. A unique pedagogical feature of this book is the use of case studies to introduce each chapter and begin the groundwork upon which concepts and theories are further analyzed. Each chapter ends with an engaging discussion of proven interventions for bringing about change, should the readers desire to get involved. Social Problems is a comprehensive and rich text that will appeal to those interested in sociology and anthropology.
