

Sport Policy Systems and Sport Federations: A Cross-National Perspective

This book explores the organisation and structure of sport in and beyond Europe. Drawing on up-to-date data, the collection's main focus lies on the relationship between public sport policy structures and sport (con)federations. The authors present thirteen country-specific contexts wherein sport policy systems are embedded, providing in-depth descriptions and analyses and framed within a solid academic and theoretical framework. This volume will be of interest to students and scholars of Sociology of Sport, Sport Management and Sport Policy.
