PLEASE NOTE: This is a summary and analysis of the book and NOT the original book. Brief Candle in the Dark by Geraldine Brooks Summary & Analysis Preview: Brief Candle in the Dark: My Life in Science by Richard Dawkins is an autobiographical depiction of his experiences as a world-renowned scientist and atheist. Dawkins has experienced an endless amount of notable events in his life, many of which were very public, such as debates, conference, and television appearances. In this second volume of his memoirs, these life experiences have inspired memories of other events, background stories of people he knew, and scientific analysis of Dawkins theories of evolution, natural selection, biology, and religion, particularly atheism versus creationism. From 1970 to 1990, Dawkins served as University Lecturer in Animal Behaviour in the zoology department at Oxford University, and from 1990 to 1995, he was promoted to Reader. He also gave tutorials in New College, where he was made a fellow in 1970. He served on a number of committees, including a committee that discussed candidates to invite to attend the school.
