

New methods for profit in the stock market,: With a critical analysis of established systems

2011 Reprint of 1948 Revised Edition. Full facsimile of the original edition, not reproduced with Optical Recognition Software. Drews work, presented here in the 1948 expanded and revised edition, is a classic work in Stock Market Forecasting. Mr. Drew presents for the first time a classified analysis of easily understood and tested specific methods for timing stock market operations--some of them entirely new. This book includes discussions of Dow theory, wave principles and moving average methods of market forecasting.
