

The Iceberg (Thawing the Iceberg Series Book 4)

The Iceberg Model is the core of the Thawing the Iceberg Series. As a unified model of addiction, codependency, and Adult/Child Syndrome the Iceberg Model provides a roadmap tracing the original pain of abandonment, the development of the survival skills that defend against that pain, and the sources of comfort & relief that become the addictions that cause even more pain. Maybe for the first time, see how it all fits together and what needs to happen to take this deadly combination apart.
