

If air travel was once the bold future, it has now settled into a mundane, on-going present. We no longer expect romantic experiences or sublime views, but just hope that we get from here to there with minimal hassle. In *The End of Airports*, Christopher Schaberg suggests that even as the epoch of flight approaches a threshold of banality, there are still mysteries to be unraveled around our aircraft and airfields. Drawing from his own experiences working at an airport, as well as interpreting these spaces from the perspective of a cultural critic, Schaberg explores the secret lives of jet bridges, seating areas, concourses, and tarmac vehicles, showing how the ordinary objects of flight call for wonder and inquiry. *The End of Airports* is not an obituary--its more like an ode to terminals in the digital age.

World War I in Mesopotamia: The British and the Ottomans in Iraq (Library of Middle East History), Venomous creatures of Australia: A field guide with notes on first aid, Journalism, Democracy and Civil Society in India (Journalism Studies), I Aint an Athlete, Lady..., CHIPS: Reinventing A Favorite Food,
