

How to win more in Forex

Read this Richard Christopher book on your PC, Mac, smart phone, tablet or digital device or in paperback. As a brand new investor and trader with zero knowledge of the business you are at a loss as to what information you actually do and do not need. Much of what the current trading education industry is putting out is not only giving you information that is all backwards, it is very unrealistic to do in the live markets, and can get you into a lot of trouble. Why would you want to learn something that could potentially cause you to lose money right away in your new trading business? The trading education industry is not regulated so beware of that. Anyone can put out a YouTube video of anything and brand new traders who are watching these types of things thinking that what they are viewing are the right things to do. I wrote How to win more in Forex for all beginning aspiring investors and traders who are just getting their head around doing the day trading and swing trading business. Everyone has their own ideas of what they think day trading and swing trading are and what it can do for them. How to win more in Forex is for people who want to start their own business and become investors and traders in today's financial markets, but have zero experience and are looking for the best quality information to get them started. Many of the things I tell brand new investors and traders in all my books may sound like I am a broken record and some things you read may sound repetitive. I do that for a specific reason because much of what trading is about is doing those same actions over and over again repetitively to make money the same way every day. It is the only way professional traders do it and how they develop their edge to win in the live markets against the best market participants in the world. The reason How to win more in Forex is unique is that it is going to tell you about who your

competition is and how you can beat them, what you need to study first that will make you rich fast, where you need to go to get consistently profitable quickly, when you should and should not be in the live market and how about the other information you need to know to be able to trade and invest in today's financial markets (or any tradable market) with confidence and zero fear and to be able to do it the right way from the start. When you are done reading How to win more in Forex you will have an excellent basic explanation of what and what not to do before you even study anything or do any kind of education. The information in How to win more in Forex will put you on the fast track to becoming a successful self-directed investor and trader with very little money invested other than the cost of How to win more in Forex, learning it Harvard or Columbia business school would cost one hundred thousand dollars or more.
