Can alcoholism be cured? What are the most effective ways of responding to the disease? How can children of alcoholics be safeguarded? In *Treating Alcoholism*, Denzin addresses these critical issues. After an overview of the nature of alcoholism as an interpersonal illness, he examines different approaches to treatment: programmes offered by social workers, counsellors, nurses, psychologists, psychiatrists and Alcoholics Anonymous with respect to diagnosis, treatment, ways of coping with relapse and of promoting long-term recovery. This important book is designed for advanced students and professionals in the helping professions.
