

Tugendhat and Christie: The Law of Privacy and The Media (0)

The first edition of this book quickly established itself as the leading reference work on the rapidly developing law of privacy in England and Wales, and the specialist team of barristers from Five Raymond Buildings (the media, entertainment and human rights chambers) and expert academic foreign law contributors have now prepared a timely new edition. Many of the contributors have appeared or advised in the leading cases which are shaping the law of privacy. The book considers how the law protects the publication of personal information without undermining the fundamental principle of freedom of expression. Since the first edition was published the law of privacy has developed considerably. As predicted by the authors, a separate and distinct cause of action, known as misuse of personal information has been created, though its precise remit is still being defined by the courts. Alongside this new tort or equitable remedy, traditional causes of action (most notably breach of confidence) remain available to provide remedies for invasions of privacy. The common law continues to be influenced by the competing rights under Articles 8 and 10 of the European Convention on Human Rights and its concurrent Strasbourg jurisprudence and, to a lesser extent, by application of the principles established in the Data Protection Act 1998. The case law is developing on a case by case basis, drawing on comparative legal and academic sources where appropriate. Against this background the debate as to whether Parliament should enact a general law of privacy rumbles on. Although intended as a practitioners guide to the law, this major work includes a consideration of comparative and international jurisprudence, as well as leading academic writings on the subject, in order to elaborate the principles upon which privacy rights are based. These may

helpfully guide the development of English law in the years ahead. The structure moves from the historical and contextual, through the academic and comparative, to the practical and developing law. At the heart of the book is an explanation of existing causes of action which may be used to protect personal privacy and practical advice on defenses and remedies that may be available. It is recognized that recent legislation, most notably the Data Protection Act 1998 and the Human Rights Act 1998, has had a significant impact on the law in this area and full consideration is given to their application. A vast range of important recent case law is also analyzed, including *Max Mosley v News Group Newspapers Ltd*, the *J.K Rowling* case and *Terry v Persons Unknown*. The topic of super-injunctions is addressed as are the latest proposals for reform of the law in this rapidly-developing and highly controversial field. Tugendhat and Christie: The Law of Privacy and the Media is essential reading for all those who act for or against the media, as well as all those with a general interest in the subject.
