

Consumer Law in South Africa

Since the late 1980s the law affecting consumers has undergone fundamental change. There is now a significant body of new law designed to protect consumers. This publication covers all aspects of that law and examines the issues which have become pertinent to modern society. It begins with an overview of consumers and consumerism and goes on to deal with important aspects of consumer law. Contentious issues such as consumer credit, debt-collection procedures and practices, and consumer protection bodies and mechanisms are discussed. In each instance, the theory of the law is explained and its practical application illustrated. This book should be of interest to lawyers, legal advisors, as well as those in industry and commerce.
