

US Credit Rating: Everything the President and Congress Know About Fixing It and Are Willing to Do About It

This book is the most comprehensive guide to everything that the US government knows (and is willing to do) to fix the US Credit rating. In other words, absolutely nothing. This is a blank book, a gag book, a book to point out that our government is out of touch with reality, a book to point out that their relationships with their parties have become more important than the country... to them. We have politicians who are willing to spend or give away our money and tax us more in return when they get us in trouble. A blank book is a fitting statement of disgust. A blank book of their knowledge would be a great gag gift for the faithful followers of the Democrats or the faithful followers of Republicans who cant get it done. A blank book would be perfect for all Tea Party members to remind them that they are being blamed by the politicians who actually created this mess. A blank book would also be a great present for the President and Congress. Imagine thousands of these being sent to them as gifts. What a statement that would be.
